

Technical Review Board Memorandum

Date: December 20, 2018

Issue: **Seismic Risk Assessment (SRA) Fee Structure**

Discussion:

Following a TRBSC Memo from November 2018 where it was advised that the new SRA's are replacing the previously used Rapid Assessments, this Memo is providing the recommended fee structure for completing SRA's, as follows:

- \$1,000 for blocks that had previously been assessed through use of the Analyzer (through SPIRs and/or Rapid Assessments over the past several years).
- \$2,000 for wood frame blocks.
- \$3,000 for non-wood frame blocks.
- \$4,000 for blocks with more than 4,000 m² space, or for blocks with extraordinary characteristics resulting in added time and effort.
 - The later would require approval from the TRB Steering Committee.
 - Please send details to Phillip Chambers, TRB Manager, at phillipchambersconsulting@shaw.ca.
- \$10,000 maximum fee for elementary schools regardless the number of blocks involved.
