Do I need to be registered with Engineers and Geoscientists BC?

Does the development of the software or software intensive system require “the application of a systematic, disciplined, quantifiable approach to the development, operation, and maintenance of software”?

- **NO**
- **YES**

Is there a reasonable expectation that failure or inappropriate functioning of the software or software intensive system would result in harm to life, health, property, economic interests, the public welfare or the environment?

- **NO**
- **YES**

Does a software engineer who is a registered member of Engineers and Geoscientists BC directly supervise and assume full responsibility for all of your engineering work?

- **YES**
- **NO**

You do not need to be registered or licensed with Engineers and Geoscientists BC. However, you cannot use the title “software engineer” or any similar title that implies that you are a software engineer (like “firmware engineer”, “mobile app engineer”, etc).

Even though you do not otherwise need to be registered or licensed with Engineers and Geoscientists BC, do you want or need to use the title “software engineer” or a similar title that implies that you are a software engineer?

- **NO**
- **YES**

Some examples of acceptable alternative titles may include “software developer”, “software designer” or “software architect”.

You need to be registered or licensed with Engineers and Geoscientists BC.
