COMPLIANCE AUDIT PROGRAM

In July 2023, Engineers and Geoscientists BC will introduce a new program to randomly assess regulatory compliance of individual registrants.

- A subset of randomly selected Registrants will have their continuing education activities and CE Plan reviewed in detail, as part of the annual compliance audit program.
- The annual compliance audit program is a proactive program intended to ensure Registrants understand and are meeting their requirements under the *Act*, regulations, Bylaws, and associated guidance.

COMPLIANCE AUDIT PROGRAM

Compliance audits will be initiated using a random selection process based on risk and will focus on assessing whether Registrants have met their obligations with respect to standards of competence, quality management requirements, relevant professional practice guidelines, and the continuing education program.

More information be available from the [Audit Program](#) webpage.

For a list of the CE requirements for the current reporting year, see the [CE Requirements](#) webpage.
