Spring- Prince George
May 27 –Jun 28, 2019

How to Apply

If you are interested in attending or bringing this program to your community, please contact

250.740.6372
nrep@viu.ca

Seats are limited

In BC and all over Canada, certified technicians are, and will continue to be, in high demand to work as monitors in hydro development, mining, fisheries, oil & gas extraction, and other environmental or natural resource-related activities and sectors. Environmental employment is recognized as an exciting and continually evolving job opportunity that may be of interest to you. Consider participating in Vancouver Island University, Natural Resources Extension Program's (NREP)

Environmental Technician Certificate program (ETCP).

Our five-week, 200-hour accredited, 'hands on' certificate training program effectively produces graduates that address the Canada-wide demand for certified environmental monitors. The ETCP is one of the only programs of its kind in Canada that offers Electrofishing Certification – a valuable and in-demand certificate.

NEW: The Environmental Technician Certificate Program is now accredited through the College of Applied Biology and meets the criteria for the Applied Biology Technician

How to Inquire

If you are interested in attending this
program, or organizing a delivery in
your community please contact

250.740.6372
NREP@viu.ca

The ETCP is designed to be delivered directly within communities, utilizing local environmental sites and conditions as the “classroom”. The ETCP courses and program are highly applied ‘hands-on’ training sessions, with field work, demonstrations, and/or field training taking place most days.

The ETCP series is comprised of a series of 1-week courses:

- Land Monitoring Skills (5 days)
- Water Monitoring Skills (5 days)
- Construction Site Monitoring Skills (5 days)
- Fish and Fish Habitat Monitoring Skills (5 days)
- Essential Environmental Skills (5 days)

Course cost is \$5,000 per participant up to 14 Participants.
