2026 MEDIA KIT

Innovation is the only magazine that reaches 50,000 professional engineers and geoscientists and industry connections in BC.

Innovation is Engineers and Geoscientists BC's flagship publication. Our subscriber base of 50,000 is employed in a variety of industries, like consulting, construction, manufacturing, high-tech, research, resources, and utilities— and a wide range of disciplines.

THE RISE OF AI

BEWARE THE UNKNOWN: RISKS FOR ENGINEERS, GEOSCIENTISTS USING ARTIFICIAL INTELLIGENCE IN PRACTICE

You may already be using AI without knowing it—and that is one of the dangers AI presents. With AI accelerating in use and development, engineers and geoscientists are in uncharted territory for regulation and guidance.

DAVID WYLIE

Artificial intelligence (AI) hype comes in waves, an ebbing and flowing tide of public discourse on how AI will shape society potentially for the better, possibly for the worse and increasing urgency over how to regulate it.

Jens Weber, Ph.D., P.Eng., a professor at the University of Victoria and Engineers and Geoscientists BC Board member, says he finds the conversation fascinating.

"If you just read the news, our society is ultimately rocked by innovations like ChatGPT, for example, image generation, creating artificial deepfake images," he says.

"There is so much unknown and uncertainties about AI, yet there are so many companies, industries, and hype around using this either in the process of engineering or in engineering

products that caution is really important about critically evaluating what you are going to use," he says.

Weber, who specializes in data engineering, health software engineering, and interoperability engineering, says that as a scientist looking under the hood at what makes the box tick is intriguing.

It's a "relatively primitive algorithm," he says. If you have enough computational power and memory, predicting the probability of words to string into sentences can result in a system that appears intelligent enough to fool humans into thinking there's another human on the other side of the screen. This type of generative AI learns from a corpus of documents on the Internet.

SUBMISSION GUIDELINES

- Format:** Saddle-stitched magazine. Type page: 7.125" x 10"; trim size: 8.125"x10.75"; bleed size: 8.375"x11".
- Frequency:** Four editions per year, in March, June, September, and December. Interactive digital version of each edition provided at egbc.ca/innovation, and distributed to subscribers by email.
- Final artwork:** Please supply RIP-ready files. Include all screen and printer fonts, and images. High-resolution Adobe PDF files (with vector/line drawings for logos/text) strongly preferred.
- Production charges:** Extra charges may apply if ad must be created, altered, or does not comply with digital requirements.

Artwork for full-page bleed ads and no-bleed ads:

All important information must be inside the grey boxed area for both ad types. This live area is 7.125" x 10". For bleed ads, the background must extend to the full outside dimensions.
